
Intent to Cancel

Overview: Until now, “phase 1” (black) and “phase 2” (blue) Professional Series ATEX radios have used different batteries. However, we have now produced and certified a new battery that can be used on both families.

This will make managing mixed black and blue ATEX fleets much easier since the new battery can be used on all GP Professional Series ATEX radios.

Products affected: NNTN5510BR GP PROF SER ATEX LI ION BATTERY
NNTN5510CR PROF SERIES 1480MAH LI ION BATTERY
NNTN7174AR PROF SER ATEX 1480MAH LI ION BATT

**Alternatives/
replacements:** NNTN5510DR PROF SERIES 1480MAH LI ION BATTERY

Timescale:
Last Order: On stock depletion.

Further information: ATEX Certificates and Declarations of Conformity for the Professional Series ATEX radios can be found on MOL.
